

POPPY

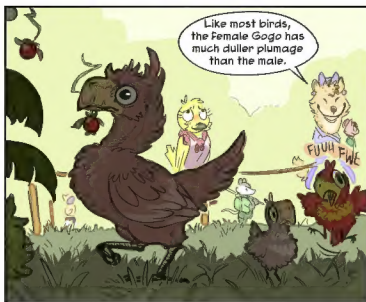

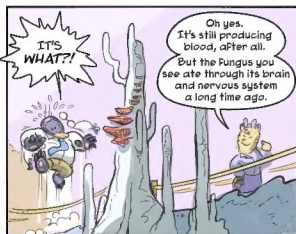

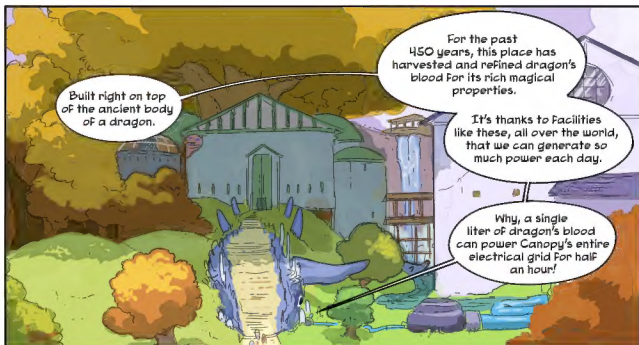

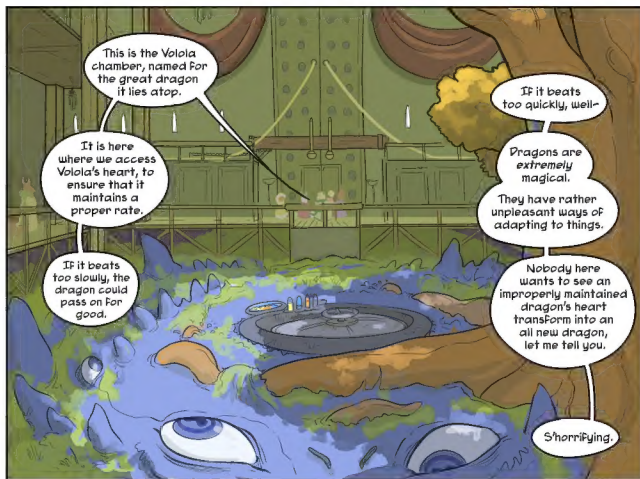

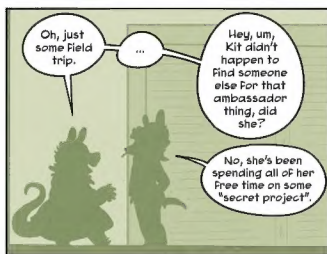

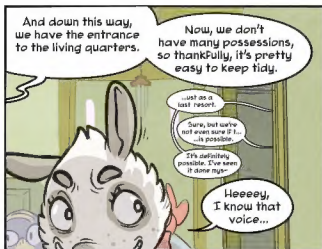

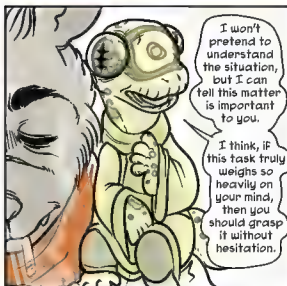

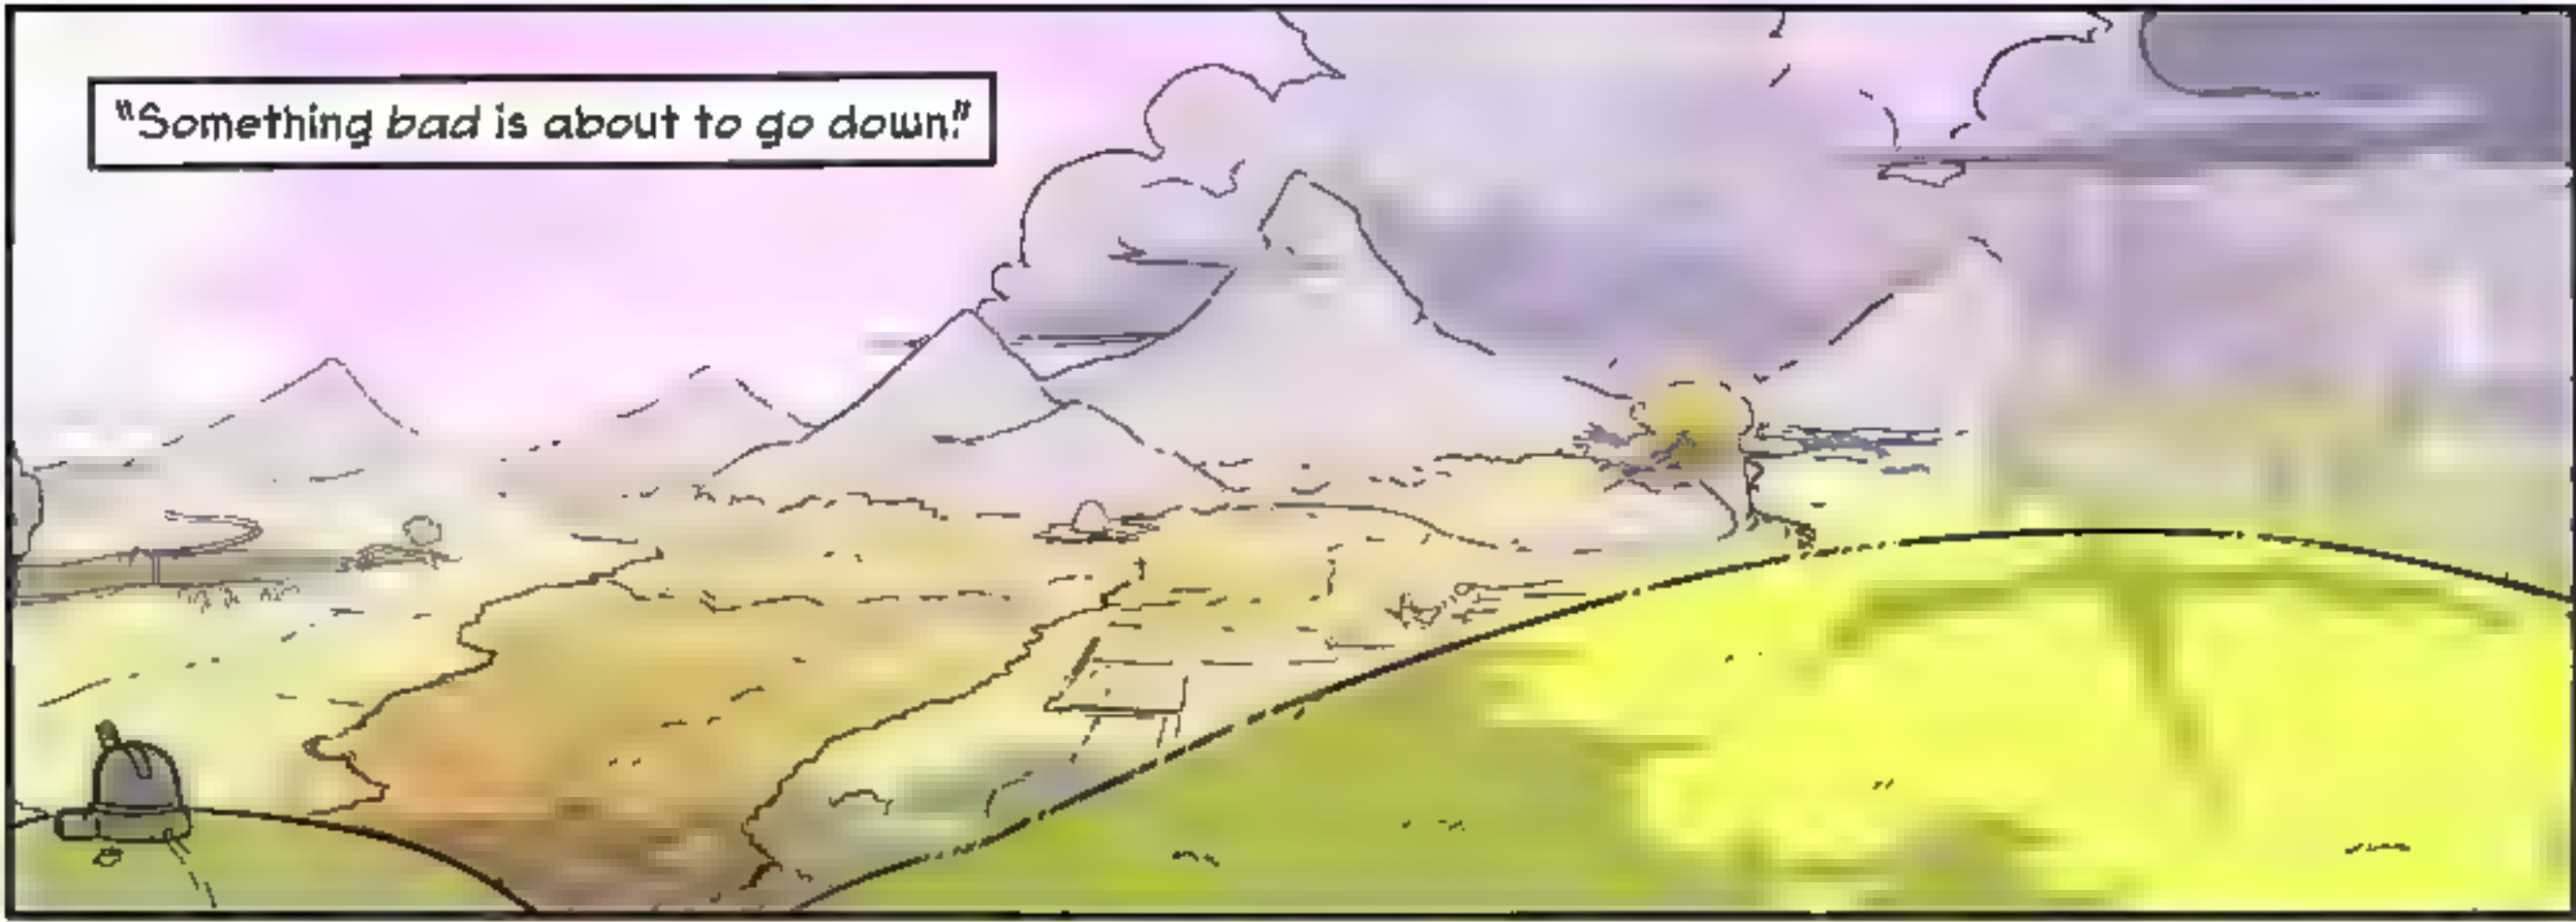

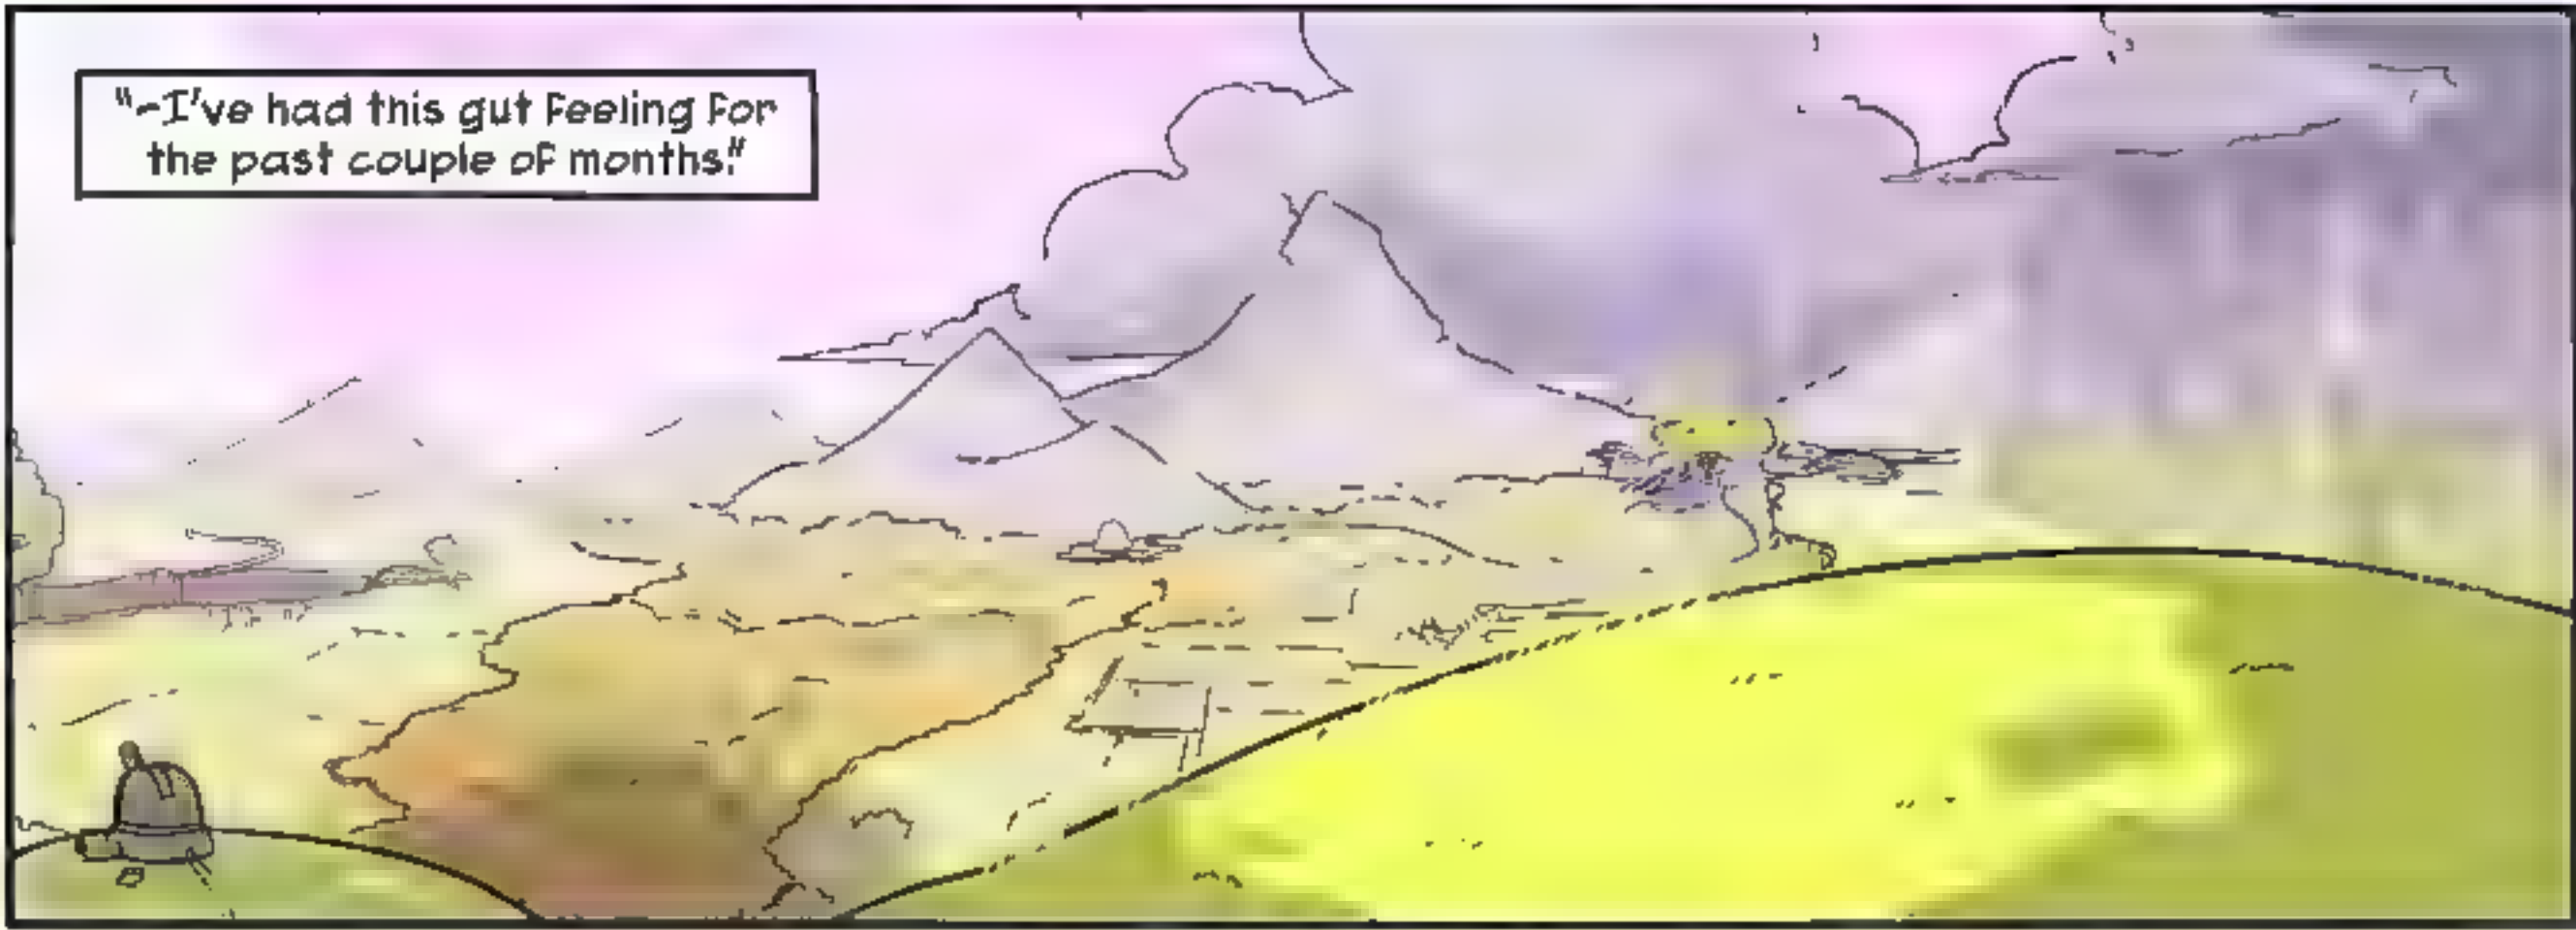

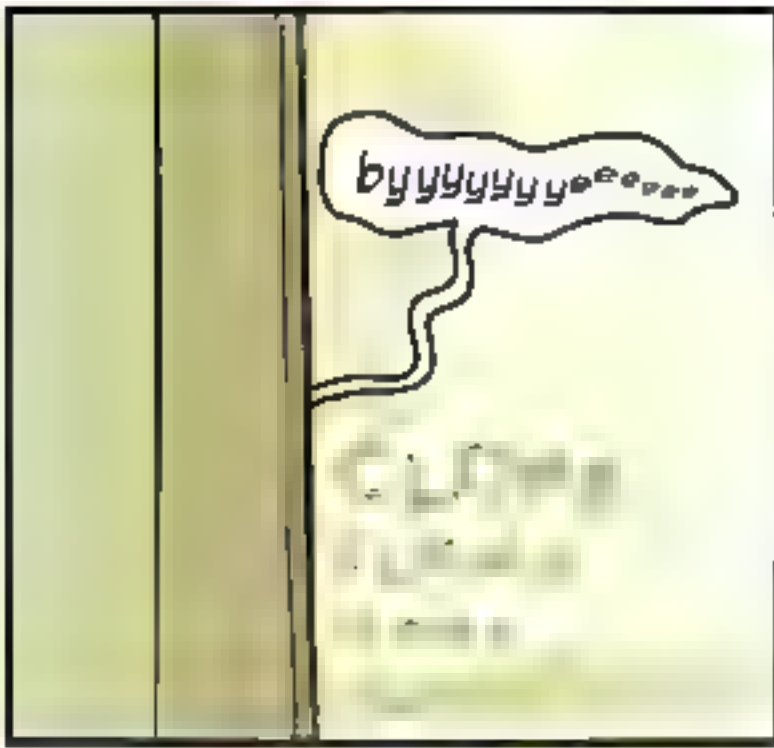

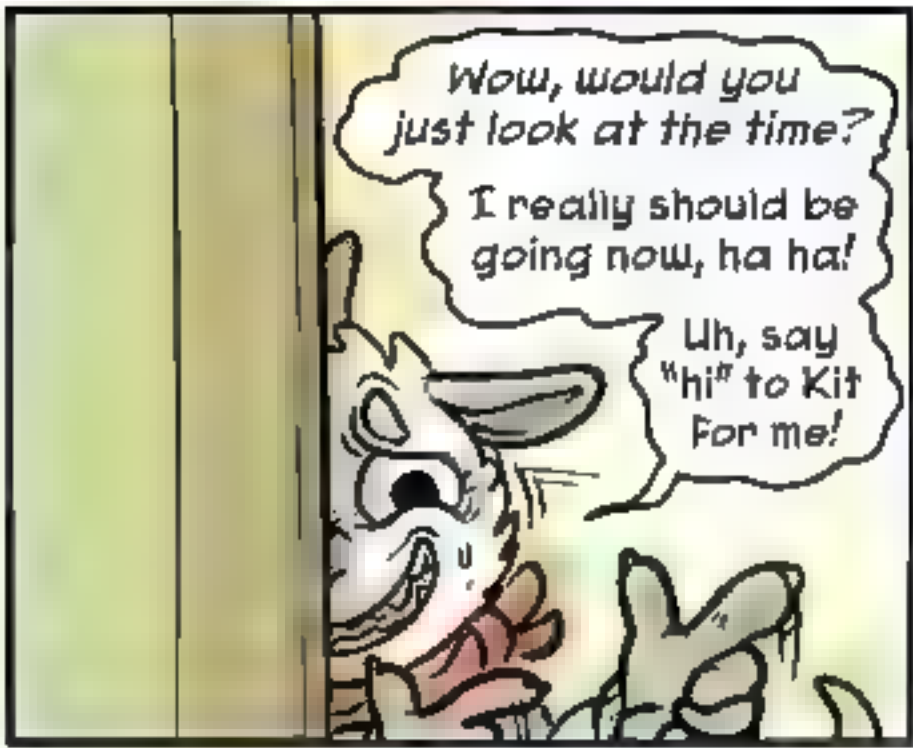

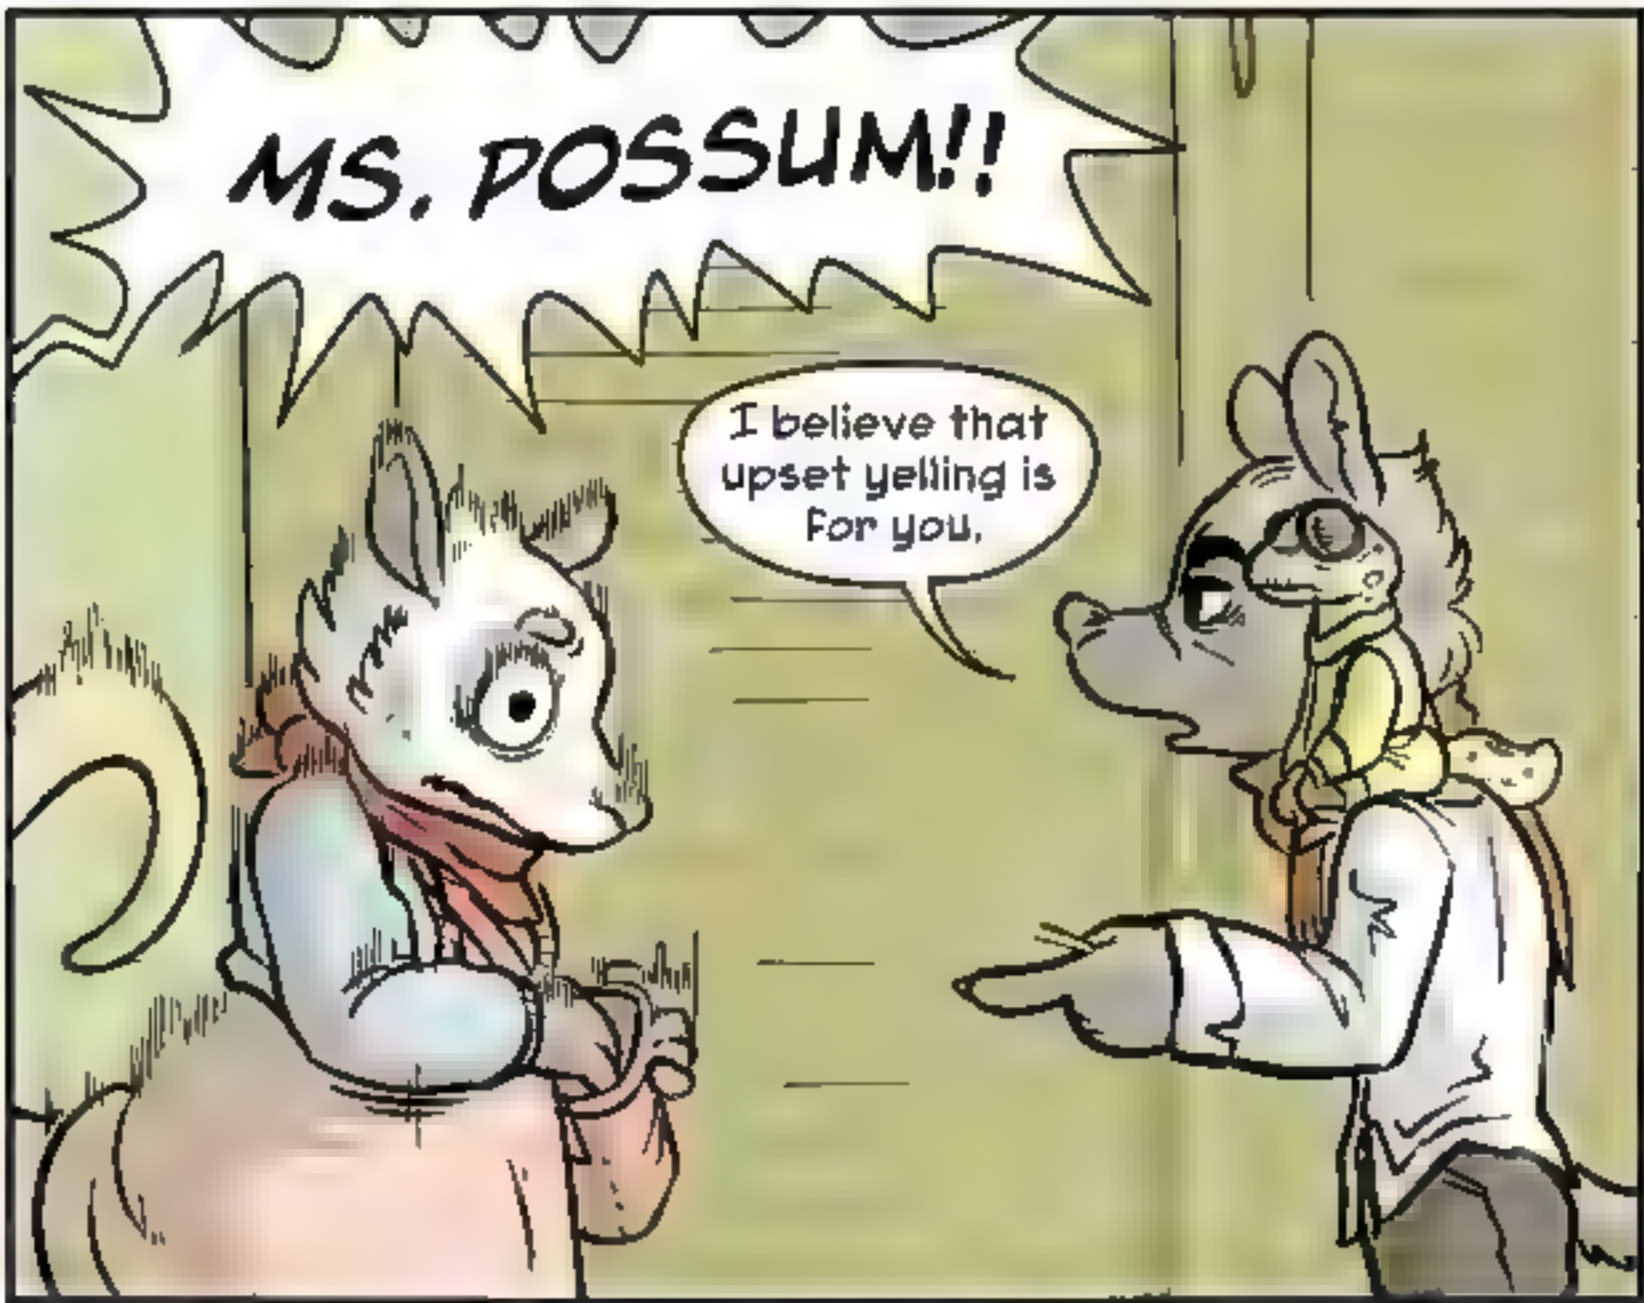

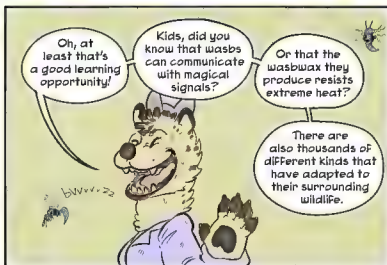

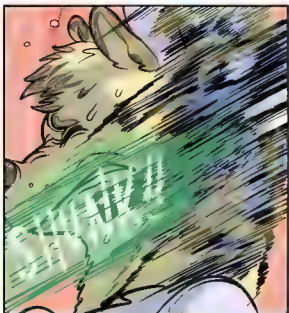

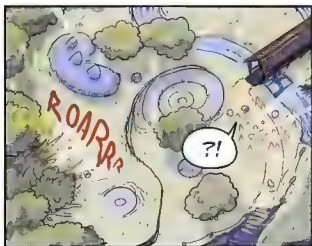

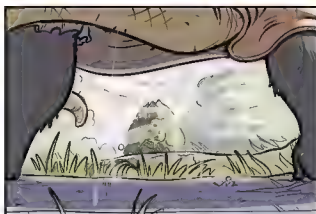

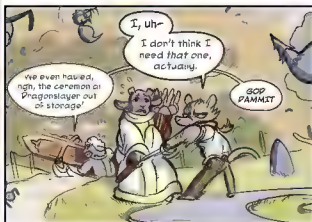

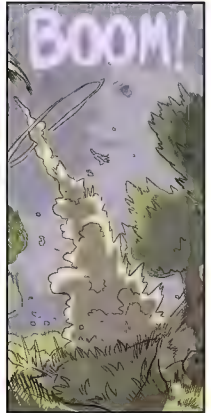

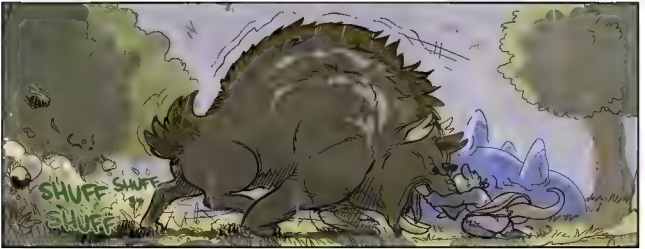

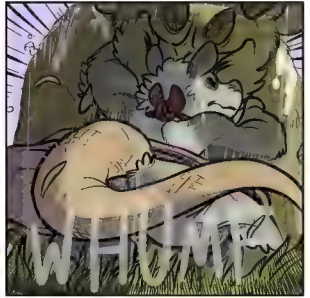

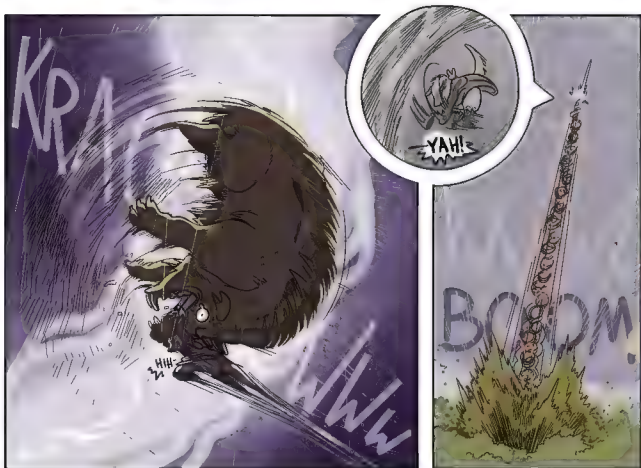

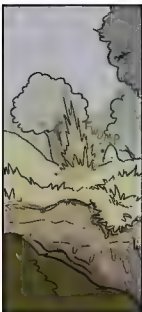

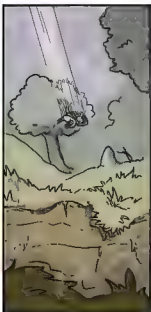

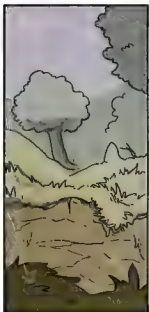

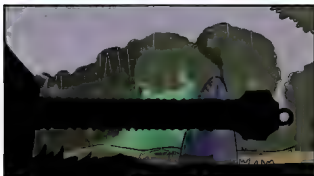

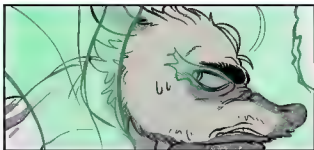

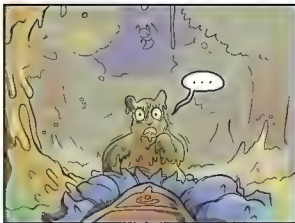

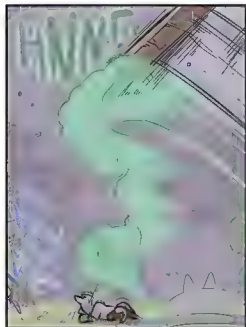

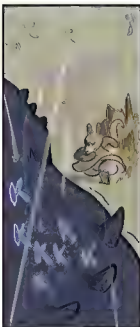

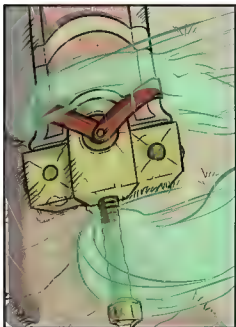

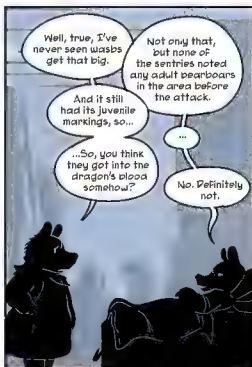

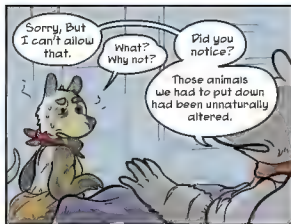

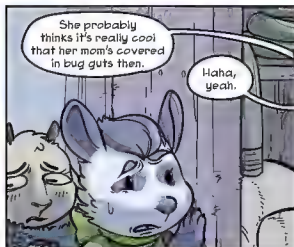

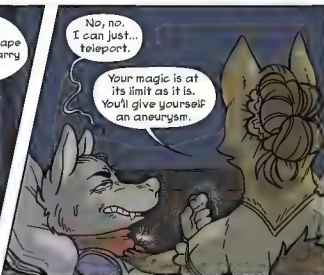

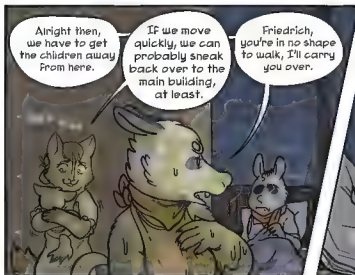

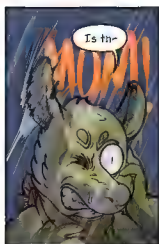

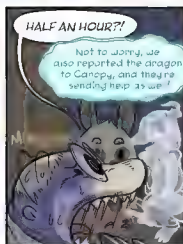

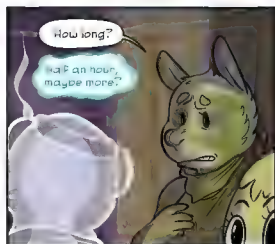

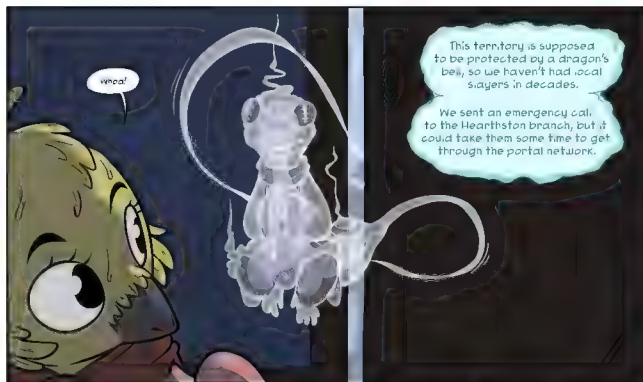

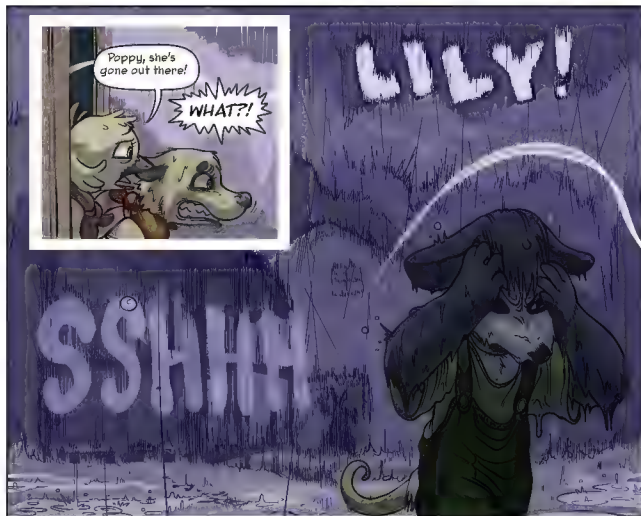

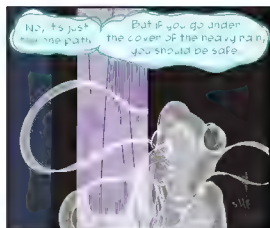

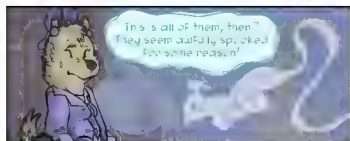

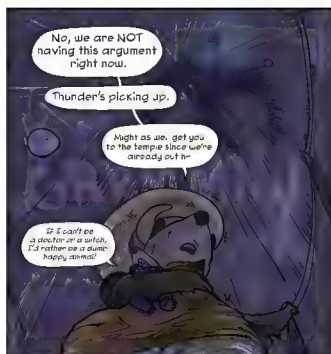

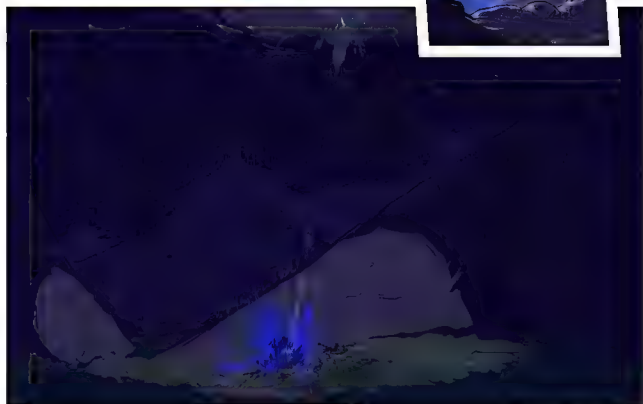

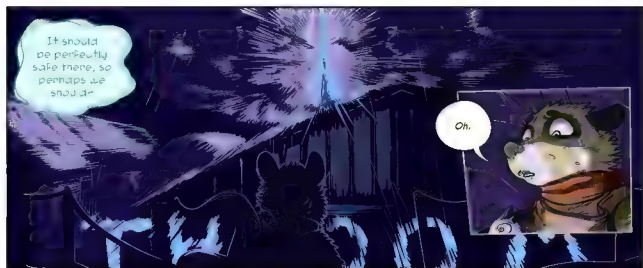

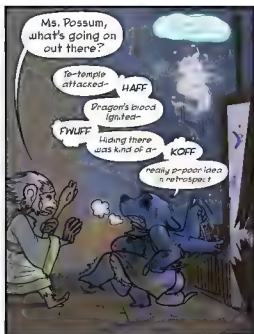

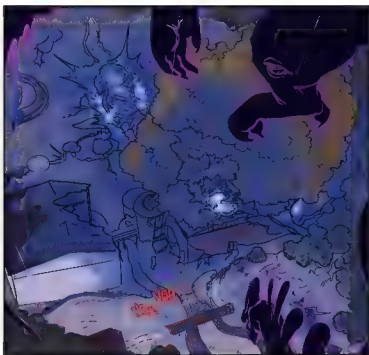

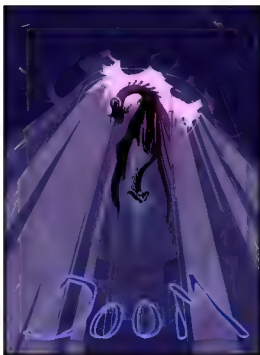

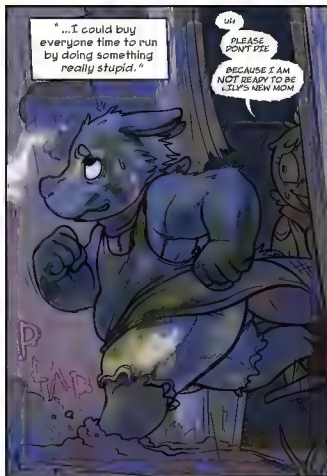

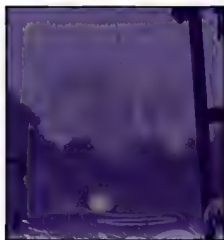

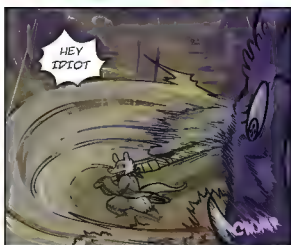

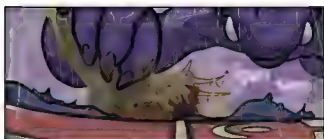

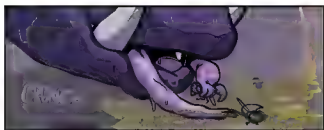

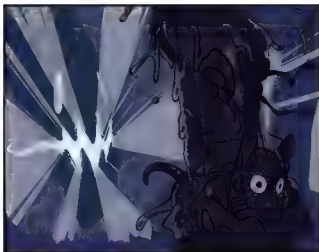

Six years, I've been doing this field trip.

~and the worst thing I would even have to deal with was a student puking in an urn full of sacred ashes,

or answering uncomfortable questions about that big growth Brother Ogard had

how we get attacked by mutated animals and a dragon in one afternoon?

Yes, rest this soul

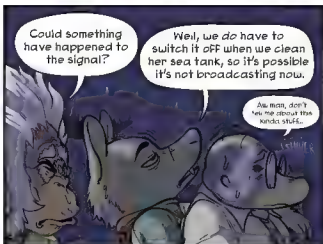

Never again, no more field trips

From now on, we stay in class and watch nice, safe videos about the water cycle, or magical death winter, or recycling

To think, an attack, in this territory.

It's concerning that our Dragon Bell isn't driving it away, yes.

Could something have happened to the signal?

Well, we do have to switch it off when we clean her sea tank, so it's possible it's not broadcasting now.

Aw man, don't tell me about this kinda stuff...

Even so, this sort of thing shouldn't happen

OKAY HONESTLY HOW HARD IS IT TO HOLD A PERSON STEADY

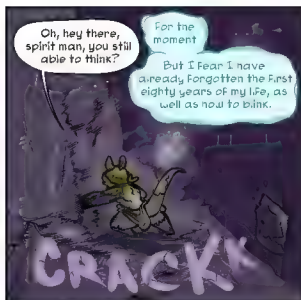

In fact, why stop there?

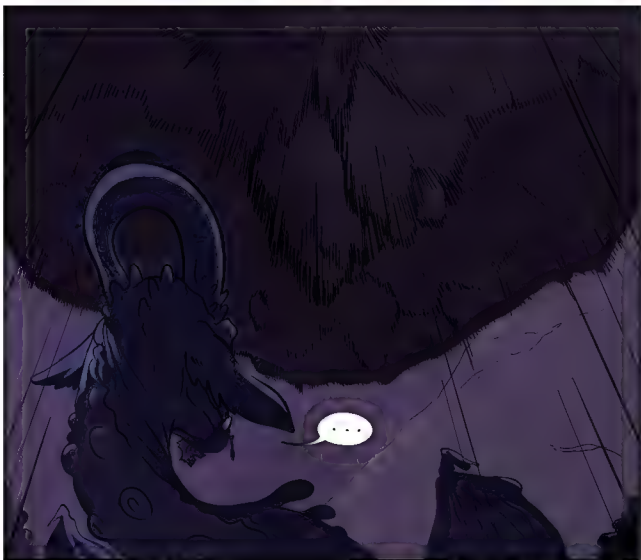

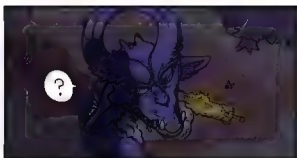

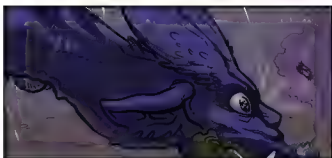

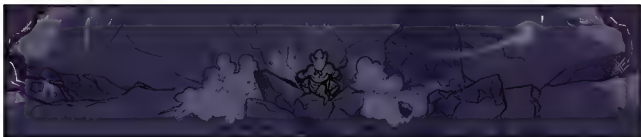

Why even go outside at all anymore?

Nora

What could you really miss out on, right? Plying?

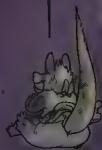

NORA

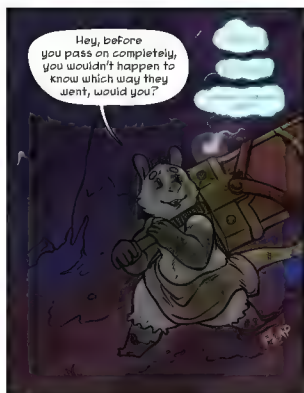

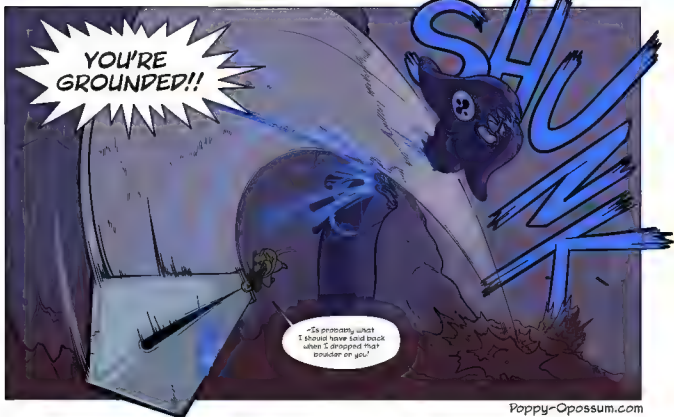

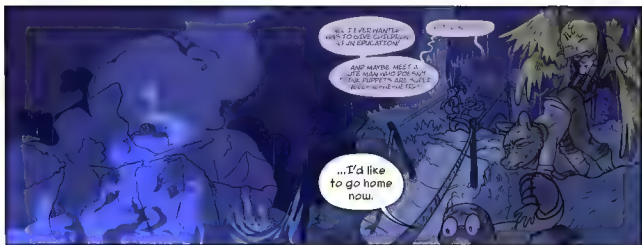

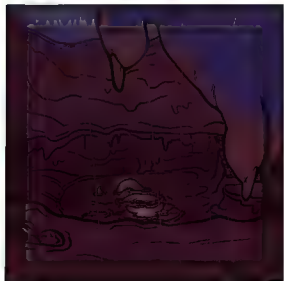

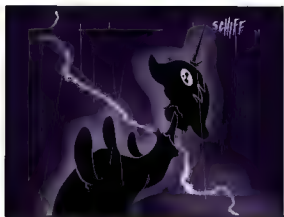

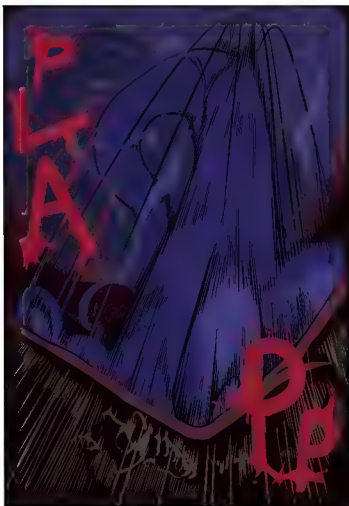

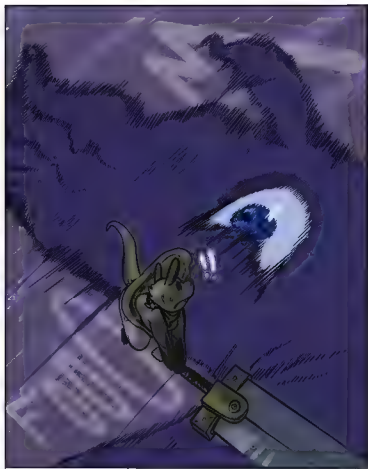

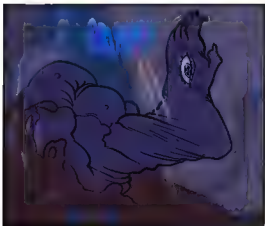

CRUNCH

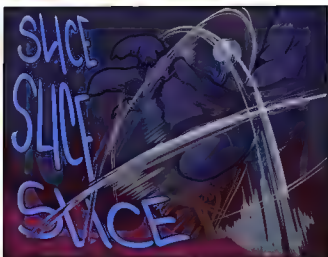

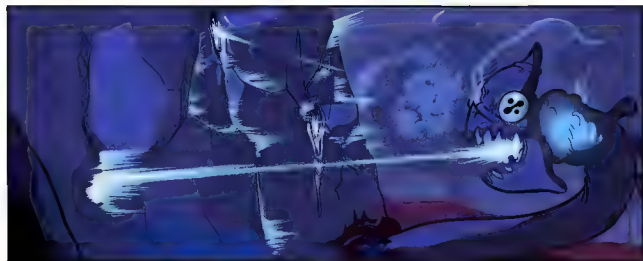

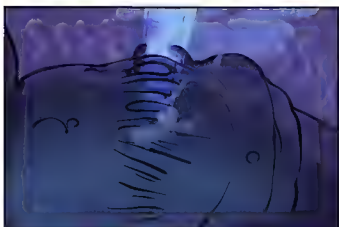

It's just easier
when you have a set
target to aim at.

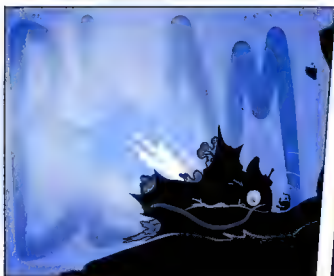

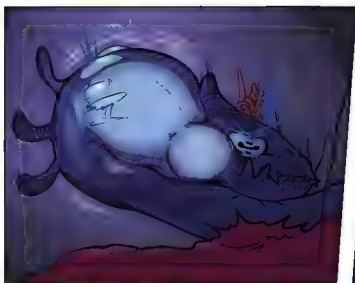

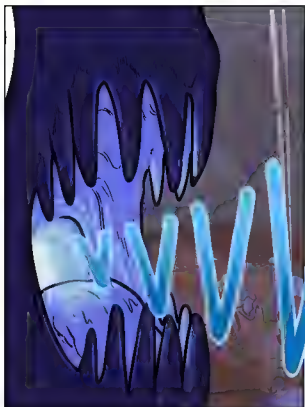

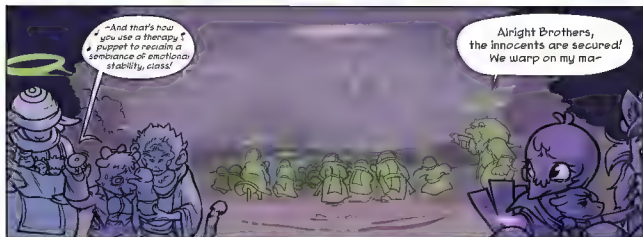

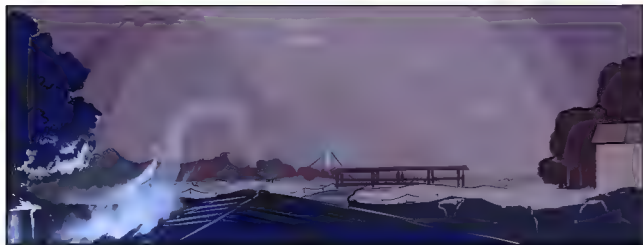

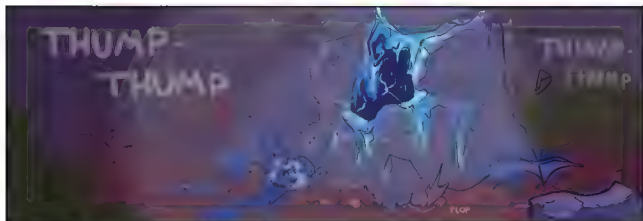

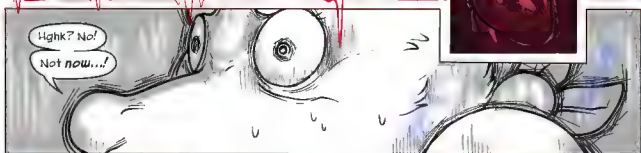

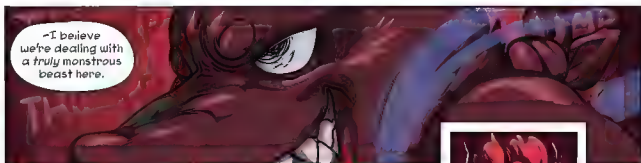

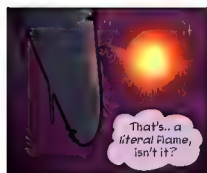

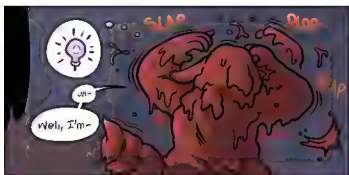

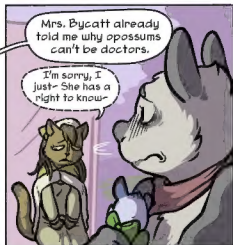

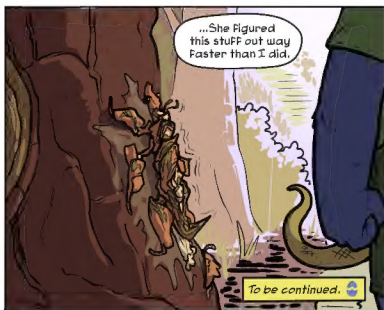

To be continued.
